DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Species in figure 4; Species in figure 5; Species in figure 6; Species in figure 7; and Species in figure 8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-6 and 19-22 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Mr. David Schuler on 2/3/03 a provisional election was made without traverse to prosecute the invention of figure 5, claims 1-6, 13-15, 19-22, and 26. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-12, 16-18, 23-25, 27, and 28 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Gilson et al. (U.S. 6,336,934).

Art Unit: 3731

Gilson et al discloses in figures 28-31, an intravascular device (1) having a contracted and expanded configurations; wherein the device (1) including an elongate wire receiving unit having a channel extending therethrough for receiving a guidewire (2), wherein said guidewire (1) having stop members (63,64).

Allowable Subject Matter

5. Claims 2-6 and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 19-22 and 26 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record disclose or suggest stop member being dimensioned in the first contracted position to move through the channel and being dimensioned in the second expanded position thereof to have an outer dimension which is greater than the inner dimension of the channel.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsugita et al. (U.S. 6,371,971) discloses a filter system.
